

TYPICAL CHARACTERISTICS:

Weight -----	260kg
Load Capacity -----	113kg
Min Fill -----	182L
Max Fill -----	303L
Pump -----	240V, 10Amp
Heater -----	40°C, 6000-watt, 240V, 30Amp
Air -----	8CFM & 120PSI (Supply Required)

DIMENSIONS

Platform -----	105cm L x 44cm W
Tank -----	113cm L x 68cm W x 96cm H
Overall -----	133cm L x 86cm W x 169cm H

TYPICAL USES: This industrial aqueous parts cleaner is designed to clean parts, using Simple Green® Parts Washing Fluid or Simple Green® Concentrated Degreasers: Industrial Cleaner & Degreaser, Crystal Cleaner & Degreaser, Supreme High Performance Cleaner & Degreaser or Extreme Aircraft & Precision Cleaner.

SAFETY:

Not to be used with chlorinated or flammable solvents
GFCI Protected

SIMPLE GREEN® 292 LITRE PARTS WASHER

The economical, safe, and innovative aqueous parts cleaning system

UNIQUE FEATURES

- Heavy-duty stainless steel construction for long lasting durability
- 70cm depth soak basin (at deepest point)
- Self-cleaning agitating platform lifts parts to top for easy loading and unloading
- Platform operates on 8CFM of air @ 120PSI
- Adjustable agitation speed (0-60/minute)
- Air filter regulator with auto drain
- Flow-through brush with polyester filaments
- Durable, baked on powder coated epoxy finishes on control boxes
- Stainless steel spring-loaded door closures
- Thermostat is preset to deliver optimal cleaning temperature of 40°C
- Includes backup thermostat (non-adjustable)
- Machine requires separate air supply and hard wiring for heater

WHAT ARE THE KEY REASONS FOR LOOKING AT SIMPLE GREEN AQUEOUS SYSTEMS?

SAFETY, EFFECTIVENESS & ECONOMY: The Simple Green Parts Washer is designed to be used in conjunction with Simple Green degreasers that are non-flammable, non-caustic and readily biodegradable. The integrated heater in the machine further improves the cleaning performance of the product and allows for greater dilution, providing even further cost savings. Simple Green® Parts Washing Fluid is also a quick break degreaser making it suitable for disposal via oil water separators. In addition to these safety features the product rinses residue-free and is extremely effective at removing hydrocarbon build-up, grease, oil and dirt.

IS THERE A DIFFERENCE IN WATER-BASED CLEANERS?

Yes. There are vast differences in water-based cleaners. Some of the differences include performance, manner of working, safety hazards, pH and disposal options.
