

## TYPICAL CHARACTERISTICS:

|                  |                                   |
|------------------|-----------------------------------|
| Appearance       | Slightly thick, clear blue liquid |
| Physical State   | Liquid                            |
| Flash Point      | Not Applicable                    |
| Boiling Point    | >100°C                            |
| Freezing Point   | ~0°C                              |
| Specific Gravity | 1.02 – 1.04                       |
| pH               | 7.5 – 8.5                         |
| Odour            | Characteristic                    |
| Solubility       | Soluble in water                  |

SDS AVAILABLE AT: [SimpleGreen.com.au](http://SimpleGreen.com.au)

**TYPICAL USES:** Hospital Grade Disinfectant. It is a concentrate that must be diluted prior to use. **Read product label for complete usage information and directions.**

**SAFETY:** Wear protective gloves/protective clothing and eye protection. **See SDS for further information.**

# SIMPLE GREEN® d PRO Hospital Grade Disinfectant

Simple Green dPro CONCENTRATE is a hospital Grade disinfectant which kills Coronaviruses including SARS-CoV-2 (COVID-19) at a dilution of 1:50. This is a blue coloured liquid with an added floral odour.

## DESCRIPTION

Simple Green® d Pro is a concentrated quaternary based, pH neutral Hospital Grade Disinfectant which is strongly active against gram positive and gram negative bacteria. Simple Green® d Pro is NOT to be used with medical devices or other therapeutic goods.

It has excellent cleaning and deodorising properties and can be used as a general-purpose cleaner and disinfectant for environmental surfaces including bathrooms, pharmaceutical and food processing plants.

The concentrated surfactant system in Simple Green® d Pro makes it an excellent hard surface cleaner. When being used as a cleaner, a concentration of 1-2ml per litre of water can be used.

It is essential that the use of disinfectants should be supported by an efficient cleaning program. The incorporation of a powerful but mild detergent system such as Simple Green® All Purpose Cleaner will not only efficiently clean contaminated surfaces, but will help disinfection action to have maximum effect by reaching the point of disinfection more readily. With the spread of highly infectious diseases, it is more important than ever to properly clean and disinfect common areas. Simple Green® d Pro is ideal for cleaning the floors of toilets, showers and any other area where disinfection is a high priority.

## UNIQUE FEATURES

- Concentrated
- Rinses residue-free
- Mild floral fragrance
- ARTG AUST L 35 3333
- Cost effective: dilute for application
- Strongly active against gram positive and gram negative bacteria.
- Controls the spread of Tinea and prevents the growth of mould
- Kills Coronaviruses, including COVID19

## APPLICATIONS

- General purpose cleaning, disinfecting and deodorising.
- Suited for hospitals, prisons, schools, public areas, health clubs, cafeterias, clinics, animal areas, pharmaceutical and food processing plants.
- Ideal for cleaning the floors of toilets, showers and any area where disinfection is a high priority.
- Specifically formulated for use in heavy duty disinfecting and cleaning procedures.
- NOT intended for use on medical devices.

## DIRECTIONS FOR USE

### For Coronaviruses:

- Dilute Simple Green dPro CONCENTRATE at a rate of 20mL/L and mix well. Apply to clean surface and allow to dry for 10 minutes.
- Hard surface disinfectant only. Not to be used on medical devices or other therapeutic goods.

### For General Disinfection in:

1. Critical areas such as toilets, bathrooms, hospital wards and theatres, Simple Green dPro CONCENTRATE should be diluted 10mL/L of potable water.
  2. Non-critical areas where the spread of infection is not high, Simple Green dPro CONCENTRATE can be diluted 1-2mL/L of potable water.
- Fresh ready-to-use solution should be made daily.
  - Storage: Store below 30C out of direct sunlight.

## PROVEN TO KILL

- Coronaviruses including SARS-CoV-2 (COVID19)
- Escherichia coli (E coli)
- Proteus vulgaris
- Pseudomonas aeruginosa
- Staphylococcus aureus (MRSA or Golden Staph)
